CARGO BAY DIMENSIONS¹ (mm)

Maximum load length (at floor level)	3707
Maximum load height (at centre)	1932
Maximum load width	1870
Load width between wheel arches	1420
Load volume (m ³)	13
Maximum width of sliding door	1250
Maximum height of sliding door	1755
Maximum width of rear opening	1562
Maximum height of rear opening	1790

WEIGHTS² (kg)

Gross vehicle mass	3510
Tare weight	1885
Payload	1558
Maximum braked towing load	2500
Maximum unbraked towing load	750
Gross Combination Mass	6000
Towball download	100
Maximum roof load	150

FUEL & EMISSIONS³

Combined Cycle (l/100km)	6.4
Urban Cycle (l/100km)	6.9
Extra Urban Cycle (l/100km)	6.1
CO ₂ emissions combined (g/km)	168
Fuel tank capacity (l) (AdBlue)	90 (15)

1. Cargo bay dimensions quoted at maximum length, and are provided for guidance only. The cargo bay is an asymmetric shape and dimensions are therefore variable. Customers must check critical dimension requirements by measuring vehicle. 2. Kerb Weight where quoted is for the vehicle unoccupied and unladen with all fluid reservoirs (inc fuel) filled to nominal capacity. Tare Weight where quoted is for the vehicle unoccupied and unladen with full fluids and 10 litres fuel. Weights may change with the addition of equipment. An individual vehicle must be weighed to establish the exact kerb weight and payload applicable to that vehicle. It is the responsibility of the driver to ensure the vehicle is operated within the legal limits. 3. Fuel consumption results are based on NEDC's standard test procedure to provide customers with a basis for comparison of the performance of vehicles in accordance with ADR 81/02 only. No test can simulate all 'real world' driving conditions. Actual on-road fuel consumption is will vary due to factors such as traffic conditions, vehicle conditions and load, fuel quality and how the vehicle is driven.
